

bernette BERNINA® 25

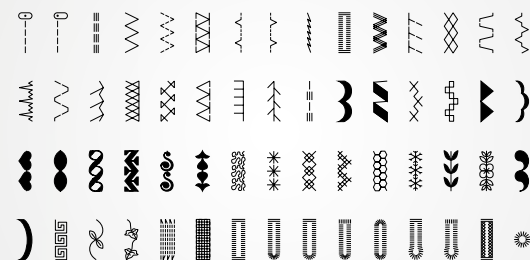

bernette 25

The computer-controlled bernette 25 is the flagship model of the bernette range. It offers everything young, creative sewers need – and at an excellent price-performance ratio into the bargain. Distinguished by its high-quality workmanship and strong needle-penetration power, the bernette 25 features a total of 155 stitch patterns (25 of which are decorative stitches) including an alphabet and numbers. The width of the decorative stitch patterns can be adjusted up to 7mm as wished. The memory function allows you to save a maximum of 30 stitch settings and combinations. In addition to features such as speed control, start/stop function and needle stop up/down, the bernette 25 also offers an automatic securing function and an especially bright sewing light. Eight presser-feet come as standard.

Discover the new design-filled world of bernette! Each of the four bernette models has so much to offer: rugged construction, masses of features, and young design in a striking new look by the name of blo:c! The smooth white exterior gleams like lacquer, set off by black accents. The red digital display shines through the white surface.

Young design for any age – that's the new world of bernette.

Stitch patterns

Semi-automatic threader

The semi-automatic threader facilitates threading by catching the thread and positioning it accurately in front of the needle. Simply actuate the threader and it effortlessly pops the thread through the eye of the needle. Couldn't be easier!

Two-level presser-foot lifter

For sewing particularly thick fabrics or multiple layers, the presser foot can be raised extra high (i.e. higher than the standard height for attaching the shank).

my bernette

Flip-top lid and dust cover

Flip up the top lid for easy access to the spool holder, threading path, thread tensioner and winder. A stitch pattern summary is provided on the inside of the lid. Close the lid after sewing to protect your bernette from dust.

Recessed handwheel

The flush-embedded handwheel for manual operation of the needle underscores the simple design and reflects the blo:c style. What's more, the handwheel's recessed design is ideal for protecting it from damage.

Easy stitch selection

Selecting the stitch patterns via the dial is simplicity itself. The number of the selected stitch pattern appears in a red digital display on the machine's white front.

Discover bernette!

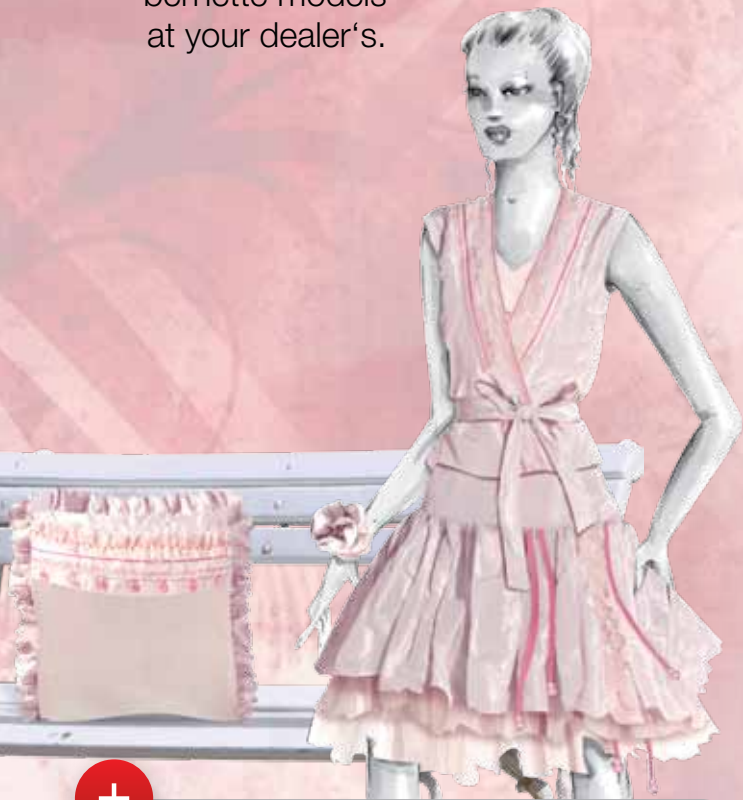

Four new models, four new young designs. Four worlds chock-full of inspiration. That's the new world of bernette.

bernette 20
BERNINA

bernette 20

A computerised model for discerning young sewers, the bernette 20 comes with 60 stitch patterns with a generous maximum stitch width of 7mm for wonderful creative embellishments. A window allows you to check the amount of thread remaining on the bobbin at any time. The convenient start/stop function lets you control the stitching process without a foot control. The needle-stop up/down function enables you to specify the position of the needle when you stop sewing, a particularly useful feature when sewing corners. In addition, stitching speed is infinitely adjustable to both the fabric and level of difficulty of a detail. The bernette 20 comes with six presser feet as standard.

bernette 15
BERNINA

bernette 15

With its 28 stitch patterns and wide range of functions, the bernette 15 offers an extensive array of creative possibilities. The more advanced of our two mechanical models, the bernette 15 is ideally suited to beginners who are after a bit more luxury at a keen price. The stitch width of the six decorative stitch patterns can be varied as wished up to a maximum of 5mm. The semi-automatic threader and the automatic buttonhole function with length-measuring system provide welcome assistance with sewing. The machine comes with six presser feet as standard.

bernette 12
BERNINA

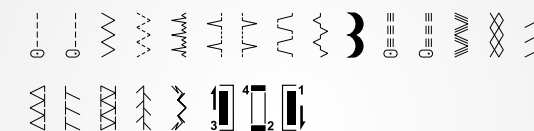

bernette 10
BERNINA

bernette 12 / bernette 10

The bernette 12 and 10 are mechanical sewing machines and the entry-level models of the bernette series. With 21 stitch patterns – 19 utility and two decorative – and a maximum stitch width of 5mm, the bernette 12 offers excellent basic functions at a very nice price. With 9 stitch patterns, the bernette 10 is available at an even more attractive price. The clear layout and user-friendliness of the two machines make them the perfect choice for newcomers to sewing. It's simplicity itself to thread the needle with the semi-automatic threader. The standard accessories of the bernette 12 include four presser feet (bernette 10: three presser feet). Both models come with a buttonhole foot which creates beautiful, even buttonholes when used with the manual 4-step buttonhole function.
